

Traffic safety campaign at Nuclear Science Research Institute (JAEA)

[J-PARC users are also involved in.]

1. Posting traffic safety posters

2. Posting traffic safety banners

These are to raise traffic safety awareness.

3. Solar lights was installed near the Main gate

Solar lights turning on automatically in the evening was installed to secure safety for commuters in going home at the place of north corner of JAEA Tokai Administration Building (near to Main Gate).

4. Assign traffic safety instructors to each Center/Divisions

5. Traffic safety patrols taken on a regular basis and irregular (unannounced).

General Affairs Division and traffic safety instructors of JAEA are on the duty for safety patrol. At Main gate, South gate and major intersections on the premises.

Mainly crack down the over-speeding*, driving in the wrong direction and ignoring pedestrians before crosswalks. *Speed limit of 30km/hour on the premises.

Record the vehicle number of the violator.

6. Reporting system (JAEA-internal only)

In case of dangerous driving or bad manners, such as over-speeding, driving in the wrong direction or ignoring a stop before pedestrian crossings was witnessed by the others, will be reported to General Affairs Division of JAEA by email/online form which to be included the time, place, vehicle number and details of the violation. (Reporting is available only by JAEA-internal people.)

7. If violations are confirmed through patrols or reports, the following guidance and severe punishment will be taken.

At the stage of the 1st time, supervisor instructs the violator.

At the second, the manager of safety driving instructs the violator.

Third time, violator is to be returned the vehicle pass to JAEA (through J-PARC Users Office) and prohibited issuance the pass for one month.
